

## Development Engineer, fulltime (M/F)

Vimecon GmbH, D-52134 Herzogenrath, Germany

Vimecon is an innovative medical device company providing solutions in multiple medical application fields, with its proprietary laser-based catheter technology. A novel laser ablation catheter should enable the successful treatment of various cardiac arrhythmias.

### Job description:

We are currently looking for qualified Development Engineers to support our Engineering resources.

Your responsibilities, amongst others, will include:

- Supporting the development of laser ablation technology
- Conducting of FMEA and risk mitigation planning, implementation and progress monitoring
- Providing support for Technical File-documentation
- Defining, planning and evaluating verification- and validation processes
- Optimization of design and production processes

### Qualifications:

- Bachelor or Master degree in Mechanical/Medical engineering or other applicable scientific fields
- Experience in similar technology fields beneficial, but not a prerequisite
- Fluency in English (B2 or higher) and German
- Very good MS Office skills (Word, Excel and PowerPoint)
- High level of self-motivation, persistence and excellent interpersonal skills
- Comfortable with team work
- Solution- and result oriented attitude and pragmatic working

### We offer:

Opportunities for growth in a dynamic and interdisciplinary work atmosphere, a young and dedicated team and a performance-oriented remuneration.
